

DSR

As we further analyzed the prompt there were some bug fixes which needed to be configured. Then we have further designed and engineered the prompt to handle some test cases created by us according to the problem statement as the earlier prompt was not capable of handling any type of job description being provided to it from several different industries. So, we designed a prompt which could resolve this issue.

Now the AI will first analyze the job description and based on its analysis it will find out the domain of the industry from which the job description belongs and based on the domain prediction it will generate the reference check questions in respect to that domain and job description.

Following is the results for store person job description: -

Domain: Warehousing and Logistics

List of reference check questions:

1. Can you describe your experience working in a pick pack environment?
