# Daily Report

## Task 1:

Designed New Prompt as per the requirement now it is generating more specific questions and the output is in the format of JSON.

## Task 2:

 Integrated the newly designed prompt into the webapp .

## Task3:

Did some testing with the iterative prompting style to achieve the best results and analyzing the output from the API.

## Task4:

The workflow is same for input but now the output can be viewed by clicking the questionnaire type from the side bar.
